Subject: Microsoft Settle

1 Billion dollars in software give away to schools is going to kill all the education resellers in this the country. This will cost Microsoft 1 million dollars in media cost to product the software on the CD's. Cost the educational resellers to go out of business and more. Help Microsoft promote it's software etc. We need to re-think this issue. Microsoft needs to give the money's to the school then purchase the software via educational resellers. Let's get your acts together about this issue.
